### **Annotated Examples** of Student Writing

The following writing collections are from ELLs in grades 2, 3, 5, 8, and high school. The collections, which come from around the state, show how students at the various proficiency levels respond to writing tasks such as narratives, personal descriptions and reflections, and academic writing in mathematics, science, and social studies.

When evaluating the English language proficiency of second language learners, it is important to know how well students communicate about everyday, familiar topics and narrate in detail about past events. It is also important to know how well they handle complex linguistic demands associated with, for example, explaining a scientific or mathematical process, defending a point of view, or writing a reflective piece about an abstract topic. The annotated writing collections in this section will help raters understand how to rate each student in a holistic manner after reading their responses to a variety of writing tasks.

After reviewing the annotated writing collections, training participants will individually practice rating student collections in preparation for the online qualification process.

# Student 1 Grade 2 Advanced High

#### Student 1 Grade 2

This student exhibits an advanced high level of second language writing proficiency at the second grade level. This collection contains writing about the student and his or her family as well as writing about science, math, and other school subjects.

In paper 1, the student presents the step-by-step process of planting a seed. The student shows the level of English needed to relate the experiment in a grade-appropriate manner. In the second sample, which is based on a picture stimulus, the student explains the things that are important to have on a camping trip. This paper shows the student's ability to express himself in a manner nearly comparable to native English-speaking peers in terms of clarity and specificity of vocabulary.

Papers 3–6 are reflective pieces about the student and his or her family. In these pieces the student shows the ability to write with clarity and ease about familiar topics. The student also exhibits the ability to use complex sentence structures (He thinks my bike is his bike but I say that it's my bike; my dad some times he takes us walking all the wai home untile the bus comes; we also have a big play groun to play when we finish all our work and test or math or language arts and social studies).

In paper 7, the student is able to communicate his or her goals in social studies using complex sentences (I want to get better at my grades especialy Social studies because I got a bery low grade). In paper 8, the student explains a challenging mathematical concept (rounding to the nearest ten). Although there are some issues with the clarity of the explanation, the type of explanation provided would not be uncommon in native English-speaking peers at the second grade level.

The student's spelling patterns and other writing conventions are consistent with those of second grade peers, with occasional exceptions when the academic demands are high, or low-frequency words are used.

Overall, this writing collection demonstrates the ability of a second language learner who has acquired the English vocabulary and language structures necessary to address second grade writing tasks with minimal support.

Planting A seed
Lex go to stepli Get all the dings you need. Firs you need a cup and then soil and a been or a seed and water different kinds of seeds or beens.
Lex go to step 2. tirs you need to have a cup then you need soil. Then you put the soil in the cup and dig a hole in the soil.
Let go to step 3: Then you dig under and put the seed that you choust. Then you need to put the soil that you did where the been is.
Lex go to stept: Then you put more soil if your been or seed wasent cover all with soil.
Lex go to step 5: The last thing to do with your been or seed put water in the soil that your had in your eup that send your name. Then your wait some days for your plant combigated. Non you now how to grow a plant.

All about me. This is about my school. On schools we have Spelling test on fridge. We also have a big plas groun to play when he finish all our work and test or math or language arts and social studies. Then we could go out side and play or jump roup. Or play with the Frisbi. Or play socer or Bascet ball on til rices finesh Student 1 Grade 2 Paper 6

	All About Me
	All about how I look like.
	I got black hair brown
	eyes I'm a little bit brown
	and a lot of white I have
	eight years old and I
	look a little bit small
	and a look to my
	Friends and my family
b	cousins and ants that
	I look like a ten
	year old bat tel them
	thet I'm eight not ten.

	Rounding to the Nearest Ten. This is how to round to the nearest ten.
	Tirst you make a line. here was mike little lines in the big lane. And put numbers there you put evouse in the number laine
	Next put a big H. And a big T. And a big O.
	Then think if it is a low 4. Or a high 5. Then you could under lines.
-	Now you know how to round.

### Student 2 Grade 3 Beginning

#### Student 2 Grade 3

This student exhibits a beginning level of second language writing proficiency in English.

His collection contains five writing assignments on a number of topics covering a variety of academic subject areas. Overall, the student shows little or no ability to address grade-appropriate writing tasks meaningfully.

Throughout the collection, the student's lack of English vocabulary and English language structures significantly hinder his ability to communicate in English. The student shows that he knows some recently practiced, high-frequency words and phrases, but he does not yet know enough English to connect ideas and convey them in short, simple sentences. The student frequently uses his primary language to express himself and relies on the phonetics of his primary language to spell even very common English words (may for "my," leero for "little," da for "the"). Even individuals accustomed to the writing of ELLs are unable to understand much of what he tries to communicate.

The writing features demonstrated by this student are consistent with the beginning stages of second language acquisition.

# Student 3 Grade 5 Intermediate

#### Student 3 Grade 5

This student exhibits an intermediate level of second language writing proficiency. She is able to convey original messages in sentences and use simple, high-frequency English to write about familiar topics.

This student has enough grasp of English vocabulary and language structures to convey her ideas in writing, although frequent second language acquisition features are present. Her writing is characterized by use of primary language phonetics to spell English words, which may make some of her writing hard to understand for individuals not accustomed to ELL writing. She frequently uses present tense when attempting to narrate about past events (paper 1). Additionally, in papers 3 and 4 her writing is repetitious in places, which often occurs when ELLs lack the English vocabulary and facility with language structures to develop and express ideas in detail. These features typify the intermediate stage of second language writing proficiency.

While this student's heavy reliance on primary language spelling patterns is indicative of the early intermediate stage of English writing development, there is evidence of oral communication skills that may be beyond the early intermediate stage. This student clearly has more than little or no ability to address grade-appropriate writing tasks in English, so she is beyond the beginning level of writing proficiency. Overall, her writing is consistent with the intermediate level. Her reliance on primary language spelling patterns and other second language acquisition features cause her to engage in grade-appropriate writing tasks in a limited way.

# Student 4 Grade 8 Intermediate

#### Student 4 Grade 8

This student displays an intermediate level of second language writing proficiency. While the student produces a considerable amount of writing, the writing is characterized by frequent primary language features and errors associated with second language acquisition.

In papers 1 and 2, the student draws upon vocabulary from mathematics and science lessons to attempt to engage in the writing tasks. The use of content area resources may make it appear that a student knows more English than is actually the case. In both papers, the student restates steps followed in math or science assignments and does so with accurate spelling and clear organization. The student's ability to express original ideas is limited, however, and primary language features (method scientific, importants investigations, verificate) and phrasing (Today in the math class, After of did, To do an investigation is necessary make the steps) are indicative of literal translating.

In papers 3 and 4, the student describes himself, a friend, and a picture of relatives. In both samples, the student demonstrates the ability to write in an original way using high-frequency English vocabulary and short, simple sentences, though primary language features and grammatical inaccuracies are frequent (my eyes are...bigs; mys tooths are small; in their back are a table and a sofa and a mallet in the table). The student's difficulty with English prepositions may impede meaning for individuals not accustomed to working with English language learners.

In paper 5, the student writes a personal narrative about accidentally going to school on Saturday. The student's grasp of basic tenses and basic grammar construction is emerging but still quite inconsistent (I went to the school but my calendar mark Saturday, I get up and I don't knew, beginning to laughed of my), which is characteristic of the intermediate stage of second language development. Note that high-frequency past tense verbs such as "was" and "were" are easily memorized and don't necessarily show an ELL's overall grasp of past tense constructions. In addition, in papers 3 through 5, the student's writing is loosely connected with limited and repetitive cohesive devices (and, because).

Overall, the student demonstrates the ability to address grade-appropriate writing tasks in a limited way. The student is able to write on familiar topics using short, simple sentences characterized by frequent features of second language development.

### Student 5 High School Advanced

#### Student 5 High School

This student displays an advanced level of second language writing proficiency. He shows enough English vocabulary and command of English language structures to address grade-appropriate writing tasks with second language acquisition support.

The student writes about a variety of academic topics with emerging grade-appropriate vocabulary and an overall grasp of English language structures, though there are more than minor or infrequent second language acquisition errors.

This student's collection may be rated too high or too low by individuals who do not adhere to the PLDs in the rating process. Focusing too narrowly on inaccuracies related to verb use and other grammar features may sway a person toward a rating that is too low. On the other hand, being impressed by this student's thoughtful ideas, organizational skills, and academic tone may suggest good academic preparation, which may sway a person toward a rating that is too high.

This student is clearly beyond the intermediate level because he is not limited in his ability to fulfill grade-appropriate writing tasks. He has not yet reached the advanced high level, though, because his writing does not yet show the need for only minimal second language acquisition support.

This student fits the advanced level profile. He is able to address grade-appropriate writing tasks but still needs ongoing specialized instruction to address his second language acquisition needs.

I still remember 4 years ago when I was in Thailand. My life was perfect like I always wanted. I had a lot of fun and lots of friends. I spend more time with my family. Almost every weekend we go travel to many different places. We had a big house which located in the big city. If I have to choose between Thailand and here, I would choose to live in Thailand.

When I was in Thailand my personality was better than right now. I had lots of friends because I am a funny person and a nice guy. My grades are not that bad, I even have time to play soccer and hang out with my guy friends. But I never forget that my family always comes first. So basically all that good things rarely happened to me again after I came to United State.

I really do believe that time did change people and also the way they through. As I came to United State the way I think is different from when I was in Thailand. It could be that I get older. But my through about my family and friends is still the same. Now I am thinking more like adult. Sometimes I felt like my fun's life is over. But when I think about my future and what I am going to be. I think every thing that I had done is worth it.

However I hoping to go back to thailand again soon. Before its too late because times does not wait for anyone. There are a lot more people that I had to take care of them before I will never see them again. Also I hoping all the good life in Thailand would happened to me again soon.

### Mother

My mother's name is . Everyone in my family called her Mae which mean mother in that. My mother is the best woman in my life and I love her a lot. She doesn't speak English that well, but she could understand some of it. My mother is not that tall, she has black and long hair. Also she is very good at cooking. I think the reason why she has lots of friends because she is a nice person and never say bad thing about other people.

I remember one time I was sick and mother was sick too. I think she got the disease from me because I was sick first. She has to taking care of me for a whole week while she was sick. It dosen't seems like she care about herself. That made me feels like I have to get better, so I could take care of her. This is one of the reason why I love her so much.

However I love my mother very much and I would continue doing that. Time cannot change me after everything that I had been through the through. My mother is the best woman in my life. I wish I can stay with my mother if my family forever.

Do you regard dropping out of school as a catastrophe? or do you believe it's something every student has a right to do? take a position and support your point of view.

I do regard dropping out of school as a catastrophe. Dropping out is bad idea for long term and short term. In order to get a job, you will need to at least finish high school. Many people who did not finish high school face many problems in later life. Many of them wish to go back and study, but some how it was too late. I better believe that undecuted person cannot live in the life of comfort. Undecated person would have problems when they have a family to take care. Most of them wish that they have a family to take care. Most of them wish that they have did not dropp out, be cause life is not easy like they thought.

Students drop out for many different reasons, some of them has to get out to help their families. Some of them get out because they thought they could make more money then stay in school. I believe all there reasons are wrong because the amount of money that they make could not help them to survive later on. People needs a job that they could stay with it for long time and get good paid.

However I will not drop out for what ever reason unless I become extremely rich and famous which hardly possible. So today I will do my best to stay in school, so that I can achieve my goal. I will take the people who drop out as a bad example. So that I could remind myself not to drop out. I hope my life would be better after I finish college.

## Peter the Great

Peter the Great is the absolute monarch. One of the reasons Peter the Great absolute monarch is that he introduced the potatoe to Russia. Potatoe's have carbohydrate which give you energy that can make you survive in cold weathers. Potatoe's can practically be grown anywhere and they good source of anyone who has them. Peter the Great was the first to create newspaper to help people get informed with what's going on around them. He adopted many ideas from Western Europe. Peter has the knowledge of science and maths for military success, which make a stronger and heavier army. Because of these facts Peter the Great is one of the best Monarchs and ruled his nation strong.

## Women In Politics Madam President

A woman for president! Describe in on editorial why this is a necessary or not necessary step in American politics. What effects will it have 9 (3 parag)

It is necessary for women to step in American politics to be a president. Because we always has men do big things. So its time for women to step in and do big things. We always say that men and women has the same rights. So why not let women be a president. I think women can work hard like men because we are human. They just need to put their mind in to it.

Every where in the world people believe that men are stronger than women. But that is only placed because Men's physical are bigger. It Many things can be done surcess with out require your physical. As long as they can use their brain, anything could be done. In these day we can see that many women did successful in their life. So they have prove that they can do anything like men. So women has to keep working, so men can out more trust on women. So in future we stand can see women working in American politics or be a president.

However I am sure that women can work just like men or even better. We just need to open our mind so that we can see better things and new things in our life. When we stick with old thing, we will not get new things. Soon or later we will see a women as a president. When people has opend mind.

## Science is important because

Science is a method for studying the natural world. The main categories that science covers are Physical Science, Life Science, and Earth Science. All the three categories are cover everything around us. Which helps discover our life, the world, and many more. Today science helps with technology. Most of the time is now became a part of our life, the fine we use electricity, medicine, radio, and more. All there things made our life easy.

Every day we use light so we can see. We turn watch television for fun. We talk to friend by phone. All there thing require electricity in order to use it. So electricity is one of the most important thing in our life.

Medicine are also very important in our life. Medicine are a substance that are used in treating disease. It would help you a lot if you take it. Because of science you we have medicine.

Science is very useful when it comes to prediction. Scientist can predict can predict the weather or even whats going to happen to the world in future. Which helps prepare for the fiture. Long time ago we lose many life from natural disaster. So is because of high technology can really many of us.

However life would be very if we do not have science. We might do many bad thing to our sleve that we do not know. But because science, we gets to get healthy and life longer if we know more about how to protect our sleve. So this is why science are very important today.

# Student 6 High School Advanced High

## **ANNOTATION**

## Student 6 High School

This student exhibits an advanced high level of second language writing proficiency. The student's writing shows his ability to address grade-appropriate writing tasks with minimal second language acquisition support.

The collection demonstrates writing that is nearly comparable to the writing of native English-speaking peers, although there are some instances of unnaturalness and awkward expression. The student makes some errors associated with second language acquisition, but the errors are minor and primarily limited to low-frequency words and structures, and the errors rarely interfere with communication.

Consistent with the advanced high level PLDs, the student shows an ability to express himself with clarity and specificity, with occasional exceptions when he writes about academically complex or abstract ideas. The quality of this writing and the precision of expression decline somewhat in the science and math samples.

Overall, the student is able to use English to express ideas and carry out grade-appropriate writing assignments on a variety of academic topics with minimal second language acquisition support. This student demonstrates the level of English proficiency needed to enable him to participate in editing activities to refine areas of awkwardness and to improve writing skills related more to academic achievement than second language acquisition.

# What is important to me?

I'm going to tell you what is important to me. The most important thing to me is my family because without them I wouldn't have the things that I have right now like a house, car, clothes and health They - re always there for me whenever I have a problem they nelp me and support me in everything I do. like whenever I had two broken ankles they feed me, they took care of me and they also took me to the obctor. I like it when my Uncle or my dad make a party and the whole family gets together and have fun. I enjoyed that because you never know when its going to be the last time to that you see their and share your thoughts with them. The thing that I most like is that they always give you ideas and explanations of any questions you have so I don't even want to think what I will do without theme

	The Ideas of the I

When I was in Mexico over the summer there was this 5% run which was weird because normally you don't expect to be marathons or running events in Mexico so to sign up. The race was two weeks ahead so I started practicing morning and night and the race was approaching day by day I was so anxiety because I never had experience or should I say ran a 5 k race I don't know in Mexico so unat to expect all I Know was that the course was going to be easy . so the day arrived, the race was going to start 7:00 au so - 6:00 am I stretaning and warmi and drinking we were arriving exe thought The people spousored

	Every body was waiting for the person to shoot the guy,
	the person to shoot the guy,
	So we saw the per-
	Sa a person was tolling
	us the justructions and as soonest
	he Finished saying the instructions
	he shot the gun, so I took
	us the justructions and as soonest he Finished saying the instructions he snot the guin so I took off really fast without getting tired I was like in 5th
	tired t was like w 5
	In the middle of the 2 mile
****	mark, there were some presty
	and coursel face runners so
	good competitors runners so at the jast 200 meters
	I Freaking started sprinting
	I freaking started sprinting I couldn't feel my legs and I passed one guy so I got 4th Aw I was proud of mys because I was only 15 years old and everybody was like 20 and up so my dad told me that he was proud of me and took me
	and I passed one goy so
	I got 4th And I was Troud of mys
	because I was only to years
	old and everybody was like 20
	and up so my day told me that
	we was provo or me and sear me
, .	out to eat.

 How to simplify 3 (X+zy)+5(2x-y) + 41y
Well first of all you multiply 3 for xand 2y then the The answer put it on the bottom of the equation. Then on the other side you of the same thing multiply S for 2x and then for y then bring it to the bottom and also bring the plus and Ly. Then you put the fairs together for example all the x's with the numbers that have the x and all the y's with the numbers that have the y and the you add the pairs and the answers of both of them bring them to the bottom with the plus sign.
The second secon
